## Wedge Anchor Driver

Cat. No.	UPC	Description	Unit	Std.
WAD 14	10514	1/4" Installation Tool	1	12
WAD 38	10538	3/8" Installation Tool	1	12
WAD 12	10512	1/2" Installation Tool	1	12

Case hardened tool drives in wedge anchors quickly without deforming the anchor or nut. Gets into hard to reach areas such as channel, strut, panels or cabinets by providing that extra few inches.

**No More Stripped Threads or Damaged Nuts!**

Dottie's wedge anchor tool will save you time and money. If you ever had to remove a damaged anchor, you'll appreciate Dottie's Wedge Anchor Tool. Simply screw the anchor into the tool to the desired thread depth, set it and WAK-IT! Remove the tool by unthreading it, and leave yourself a perfect anchor to work with—every time. Remember to wear eye protection see page E12.
