Plastic-Handle Hollow-Shaft Nut Drivers

Vaco nut drivers meet or exceed current ANSI and MIL specifications.

Patented shaft construction withstands high torque. Shafts on Vaco drivers are completely hollow, from the socket to the handle, to accommodate the longest stud.

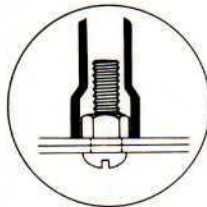

Sockets and shafts are specially heat treated for extra hardness. Exterior surfaces are finished in bright nickel-chrome for durability and corrosion resistance.

Smooth Comfortome[®] handles fit the palm of the hand perfectly. Exclusive full-size top with no unfinished seams, no sharp edges to cause fatigue. Handles are break resistant, impervious to most acids and alkalis, and are full-fluted for better grip and driving torque. Edges are chamfered for comfort. Handles are color-coded for easy identification.

Vaco nut driver handles are color-coded to make identifying the proper driver for the job easy and sure.
