About Netversity Solutions

Established in 2002, Netversity Solutions has been a full service design, manufacturer and distributor of data racks and cabinets, connectivity management products, UPS systems, A/C units all factory pre-assembled networks and delivered in a true plug and play solution. Netversity filled a void in the IT infrastructure market space for fully loaded, ready to go, turnkey racks and cabinets fully assembled and tailored to specific application needs.

As a member of BICSI and with RCDD personnel on staff Netversity is committed to providing customers with the most up to date technology, design and products in the IT field. Our staff of dedicated employees have an average of 15 years in the communications and services industry. Clients can rely on our team of dedicated and technically skilled staff to assist them in selecting the correct products and services to fulfill their requirements.

Our Customer Service associates are unsurpassed in their product expertise. In addition, our integrated Canada wide network allows us to deliver the latest technologies and products, reliably and efficiently.

Netversity's head office is located in Newmarket, Ontario with branch offices located in Montreal, Winnipeg, Calgary, and Vancouver.

Netversity Rack Systems

Netversity Rack Systems are engineered and developed for the data and communication industries. All racks are available in two (2) or four (4) post configurations as well as wall mount solutions.

Our racks are manufactured using 10 GA steel to recognized industry standards (EIA). All racks are fully welded for rigidity, providing the highest levels of structural integrity.

Netversity racks are modular in nature, accommodating both datacom and telco requirements.

Racks

NVR-1944	Standard Rack 44U
NVR-1948	Standard Rack 48U
NVR-1944-M2	Standard Rack w/ 2x 5" managers
NVR-1944-4P42	Standard 4 post Rack 44U Adj 24-42"d
NVRSO-1944	Standard Swing Out Rack 44U

Vertical Cable Management

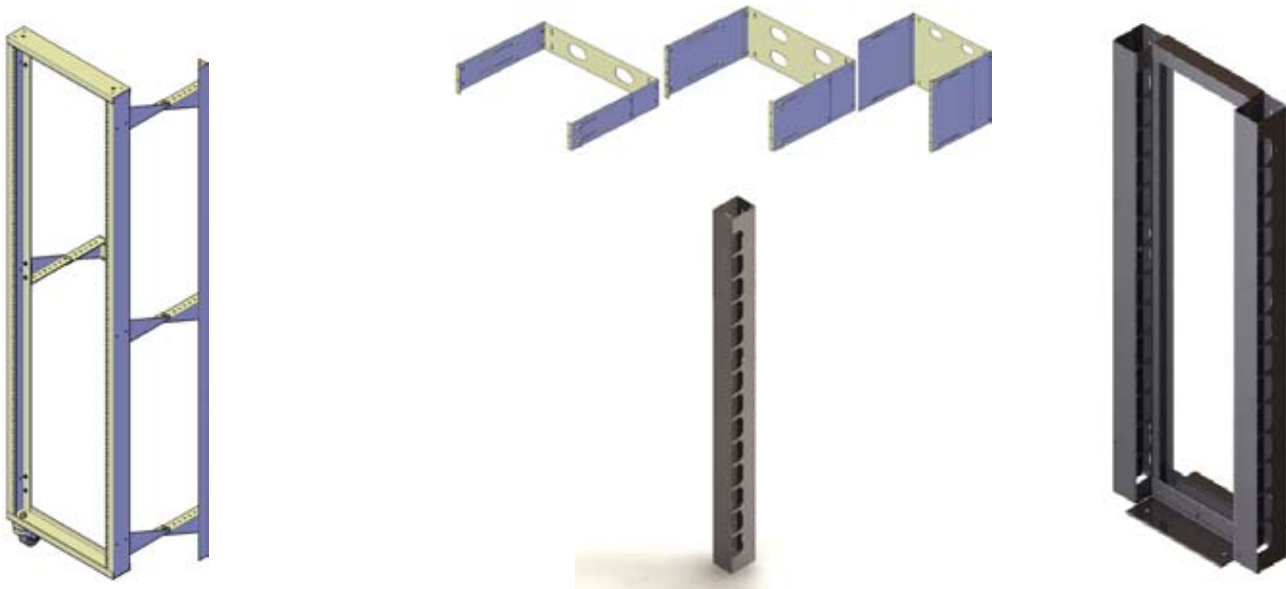

NVR-VCM-5	Vertical CMS 5"w x 6.5"d
NVR-VCM-7.5	Vertical CMS 7.5"w x 6.5"d
NVR-VCM-9.5	Vertical CMS 9.5"w x 6.5"d
NVR-CMXT-36	Vertical Chimney Extension

Horizontal Cable Management

NVH-CM1	Horizontal 1u CMS
NVH-CM1F	Horizontal 1u CMS Finger style
NVH-CM2	Horizontal 2u CMS
NVH-CM2F	Horizontal 2u CMS Finger style
NVH-CM3	Horizontal 3u CMS

Netversity Rack Systems

Netversity rack systems come in a variety of standard sizes and options. All are available with or without vertical cable managers. Each of the optional rack sizes, both free standing as well as wall mount, have a full compliment of matching shelves, cable managers, and power systems in compatible sizes. Custom sized racks are available with the full compliment of accessories.

Netversity rack options:

Vertical cable management

Various Sizes available for all of your cabling requirements

Horizontal cable management

Various sizes available to provide optimum management for your telecom/data cabling.

Shelves

Many styles to choose from: vented, solid, flush mount, centre mount, Custom sizes available.

Power bars

Basic/metered/Intelligent IP

Styles range from basic, metered, smart, IP

Overhead cable management

In addition to the vertical and horizontal cable management within the rack the overhead management allows you to run your structured wiring and/or patch cabling across the top of your racking reducing the amount of cable in the overhead tray and under the floor, providing a clean and organized cabling solution.

NetStage Service

Our Netstage service is a unique offering in the data cabinet and rack industry. We will completely assemble cabinets and racks, then pre-load with our value added products such as UPS protection, high speed data switches, patch panels, and KVM solutions. As part of the staging process, we are also able to install switches, servers and other components into your cabinets or racks as required. All this is done in our Net-Stage operations center, where we professionally assemble as per your specifications and drawings. On request, Netversity will provide single part numbers for fully assembled kits to eliminate listing multi-vendor part numbers to expedite shipping and receiving.

- Equipment is pre-mounted according to rack and cabinet elevation drawings
- Equipment and PDU's can be pre-tested, powered and plugged according to specifications
- Cables can be pre-terminated, and especially in the case of fiber, terminated in a clean, stable environment
- Quality control is emphasized to ensure consistency and reliability
- With pre-assembly and staging the on site issues such as missing hardware, recycling and packaging, lost equipment due to multi-vendor shipments (smaller packaging) is all cared for at our site

Data centers

- Trained and certified factory technicians assemble and test all solutions
- Consideration for equipment placement for proper cooling, and power cable dressing
- High volume/high density cable routing design can be completed prior to shipping

Branch designs

- Duplication of design for roll out solutions
- Every component placed the same for all installs
- Quality controlled process
- Level indicators for shipping to determine if equipment has been tilted, dropped or shipped on it's side prior to unpacking

NetPower Systems

Netversity offers a comprehensive selection of power management solutions that will adapt and grow with your changing requirements. Industry standard Power Distribution Units (PDU) are available, including IP based PDU's. Custom PDU's are available for customers that have unique requirements.

From the desktop to the data center, we deliver a complete solution through our line of single and 3 phase AC and DC power systems, connectivity options, and software

Consulting – We provide an analysis and recommendation of the power protection solution

Full Range of PDU's - Standard power protection systems

Staging – Factory installed as part of the NetStage offerings

- Power options, 15, 20, 30, Single and 3 phase Amp service
- Surge Protection
- IP Power management available, with options for power reports, power control
- Standard sizes for easy installation into racks and cabinets
- Improved design allowing for flexible deployment and voltage choices.
- Allows for more efficient use of power feeds
- Reduces the excess power cabling throughout the rack
- Custom fabrication available
