

WESCO Recycling Program

Leadership In Lighting

At WESCO, we are committed to providing you with quality electrical and lighting products, unmatched technical expertise, and extra-effort service. As part of that commitment, we are also dedicated to finding ways to help you improve operating efficiency and reduce costs. Lighting is one area that provides opportunities for energy savings, cost reductions, recycling solutions and better worker productivity.

Recycling Used Lamps Made Easy...

Fluorescent lamps, batteries, ballasts, electronics and computer equipment usually contain mercury, lead and other heavy metals or harmful materials, all of which are considered toxic and hazardous to human health and the environment. There is enough mercury in one fluorescent lamp to contaminate over 7,000 gallons of drinking water if improperly disposed.

Generators of lighting and electronic waste need an easy and convenient manner in which to recycle this waste in compliance with federal, provincial and local disposal regulations.

Are your used lamps being disposed of properly?

Recycling Solutions. Cost-effective. Simple. Safe

WESCO has developed partnerships with leading environmental services companies across Canada to provide safe, convenient and cost-effective recycling programs for small or large quantities of used lamps. These organizations ensure that used lamps are reprocessed in an environmentally friendly manner and that hazardous materials are removed from the waste stream. WESCO approved recyclers can provide you with documentation to verify the downstream processing of all hazardous waste in compliance with applicable regulations.

Our purchasing power with these suppliers provides our customers with the most cost effective recycling solutions.

Small Quantity Recycling

Each of our recycling vendors has programs to make recycling small quantities of lamps easy. One price includes everything required to recycle; the container, return shipping, processing and documentation. Simply order, fill, seal and ship.

Program Details

- Designed for small quantities, or less than one pallet (about 25 boxes)
- Wide selection of supplies
- Perfect for ongoing facilities maintenance

Large Quantity Recycling

For larger quantities of lamps (one pallet or more), our vendors can tailor a recycling solution to fit your needs, including pick-ups of large quantities, prepaid recycling programs or a combination of both.

Program Details

- Designed for larger quantities that result from re-lamp and retrofit projects, large quantity generators, and companies with multiple facilities across the country.
- The large quantity program is priced on a per unit basis plus transportation and packaging.

WESCO Recycling Program

Customized Packaging Solutions

WESCO approved recyclers can also provide customized and reusable bin options for your unique recycling requirements.

To learn more about recycling your lamps, please contact the following WESCO Environmental Solution Providers.

Company	Geographical Areas of Operation*	Contact Information	
aevitas	Ontario, Newfoundland, New Brunswick, Nova Scotia, PEI	(800) 324-8997	dan@aevitas.ca
