

Contract Number: E60HN-21EVSE/003/HN

Electric Vehicle Supply Equipment (EVSE)

More Than Just a Charging Station

Discover your ideal EV charging solutions with ChargePoint and Wesco, the trusted providers for government entities.

Together we offer tailored solutions for federal departments, agencies and Crown Corporations, helping to ensure seamless integration and support.

Call-ups can be made up to \$750,000 per request. Contract runs until October 2026.

- A comprehensive solution for light-medium-, and heavy-duty vehicles, including in-depot, on-route and take-home fleet charging, parking structures, on-street parking and more
- An integrated software platform delivers the flexibility to support public, workplace and fleet charging depending on the needs of each location, serving your vehicles and your community
- Innovative cable management makes charging easy and convenient, helping to ensure the cables stay off the ground
- Drivers given access to pricing information, instructions and charging status with an interactive display that supports multiple languages, video uploads and gesture control
- Multiple federal agencies, including Measurement Canada, Transport Canada, Canada Revenue Agency, Public Services and Procurement Canada are already using ChargePoint to meet their charging needs

Industry-Leading Support

ChargePoint Assure®

Avoid hassles and minimize downtime with the ChargePoint maintenance and management program, which provides proactive remote monitoring to safeguard the operational readiness of your charging stations.

Features include:

- Around the clock remote monitoring helping to ensure 98% uptime per year
- Proactive dispatch of repair technicians
- Warranty extension of up to five years
- Coverage of service costs, including in the event of vandalism and accidents

ChargePoint Solutions

- Energy management software optimizes the installation costs of the charging station depending on the power available on site
- Built-in reports help meet reporting requirements and track progress against emission reduction goals as federal agencies aim to achieve 100% zero emissions by 2035
- Thanks to automatic notifications, the premium mobile app allows your drivers to charge anywhere and monitor the charging process wherever they are
- 24/7 support for drivers and dedicated support for operators and installers helps ensure that the charging solution is always available when needed
