

Wire and Cable Enhancement Services

Wesco has developed a suite of cabling services designed to support your projects during installation. These solutions can be mapped to your specific needs and deliver immediate benefits including:

- Minimize risk of injury
- Minimize scrap
- Optimize labour
- Speed installation
- Mitigate risk
- Lower project costs

Paraspin allows different diameters of cable to be pulled simultaneously by using independent spinning chambers.

Paralleling is ideal for remote locations, pulls multiple conductors simultaneously and reduces the number of reels to manage on-site.

Ready Grip (Low Voltage & Medium Voltage) eliminates on-site termination by having medium-voltage pulling eyes installed by Wesco.

Insta-reel consists of a standard wooden reel that has oversized flanges attached to both sides and becomes a payout stand when chocked in place.

Parapull has multiple chambers to prevent cable legs from binding with each other. It eliminates waste and allows for smoother pulls and setup time. Makes it easier to locate all legs of the circuit on job site.

Ingenuity delivered.

Wire and Cable for Every Application

Wesco stocks wire and cable for standard and specialty applications. From common building wire cables to specialized critical environment cables.

We cut most cables to your specific lengths which reduces waste and labour cutting cables on site.

Products Available:

- Armored cables
- Automation cables
- Battery cables
- Building wire (CU and AL)
- Communication cables
- Control cables
- Fiber optics cables
- Grounding wire
- Instrumentation cables
- Lead wires
- Medium voltage cables
- AC90 cables
- Mining cables
- Portable cord
- Power cables
- Shipboard cables
- Solar cable
- Thermocouple
- Variable frequency drive
- Welding cable

Application and Engineering Resources

Wesco not only stocks wire and cable, but we also support you with application and engineering assistance.

Wire and Cable Engineering Services:

- Assist in interpreting codes and standards
- Cable sizing to meet load conditions
- Design custom cables
- Develop, review, and update cable specs
- Provide installation recommendations
- Pulling calculations
- Rigging recommendations
- Routing and layout planning

Wesco offers a wide array of wire and cable enhancement services to help you execute your projects on time and under budget.
